(1) Find the volume of a solid cylinder whose radius is 14 cm and height is 30 cm.Solution(2) A patient in a hospital is given soup daily in a cylindrical bowl of diameter 7 cm. If the bowl is filled with soup to a height of 4 cm, then find the quantity of soup to be prepared daily in the hospital to serve 250 patients?Solution(3) The sum of the base radius and the height of a solid cylinder is 37 cm. If the total surface area of the cylinder is 1628 sq.cm, then find the volume of the cylinder.Solution(4) Volume of a solid cylinder is 62.37 cu.cm. Find the radius if its height is 4.5 cm.Solution(5) The radii of two right circular cylinders are in the ratio 2:3. Find the ratio of their volumes if their heights are in the ratio 5:3.Solution(6) The radius and height of two circular cylinders are in the ratio 5 : 7. If its volume is 4400 cu.cm, find the radius of the cylinder.Solution(7) A rectangular sheet of metal foil with dimension 66 cm x 12 cm is rolled to form a cylinder of height 12 cm. Find the volume of the cylinder.Solution(8) A lead pencil is in the shape of right circular cylinder. The pencil is 28 cm long and its radius is 3 mm. If the lead is of radius 1 mm, then find the volume of the wood used in the pencil.Solution(9) Radius and slant height of a cone are 20 cm and 29 cm respectively. Find its volume.Solution(10) The circumference of the base of a 12 m high wooden solid cone is 44 m. Find the volume.Solution(11) A vessel is in the form of frustum of a cone. Its radius at one end and the height are 8 cm and 14 cm respectively. If its volume is 5676/3 cm3, then find the radius at the other end.Solution(12) The perimeter of the ends of a frustum of a cone are 44 cm and 8.4 Π cm. If the depth is 14 cm, then find its volume.Solution(13) A right angled triangle ABC with sides 5 cm, 12 cm and 13 cm is revolved about the fixed side of 12 cm. Find the volume of the solid generated.Solution(14) The radius and height of a right circular cone are in the ratio 2:3. Find the slant height if its volume is 100.48 cu.cm (take Π = 3.14).Solution(15) The volume of a cone with circular base is 216 Π cu.cm. If the base radius is 9 cm, then find the height of the cone.Solution(16) Find the mass of 200 steel spherical ball bearings, each of which has radius 0.7 cm, given that the density of steel is 7.95 g/cm3. (Mass = Volume x Density).Solution(17) The outer and inner radii of a hollow sphere are 12 cm and 10 cm. Find its volume.Solution(18) The volume of a solid hemisphere is 1152 Π cu.cm. Find its curved surface area.Solution(19) Find the volume of the largest right circular cone that can be cut of a cube whose edge is 14 cm.Solution(20) The radius of a spherical balloon increase from 7 cm to 14 cm as air is being pumped into it. Find the ratio of volumes of the balloon in the two cases.Solution Kindly mail your feedback to v4formath@gmail.comWe always appreciate your feedback. ©All rights reserved. onlinemath4all.com This is a well rounded review that will challenge students to apply their knowledge and application of the unit over volume. A thorough step-by-step key is also included. The following concepts are covered: Finding volume of cylinders, cones, and spheres Finding volume of cylinders, cones, and spheres in terms of π Finding the radius or height of cylinders, cones, and spheres when given the volume Word Problems covering: Using Pythagorean Theorem to find the height and radius of a cone Applying the relationship between the volume of cylinders and cones with the same radius and height Finding volume of cylinders, cones, and spheres Product Videos Contributor The Math Huddle Grade Level 7, 8, 9, 10 Product Type Review, Worksheet File Type PDF Pages 4 Answer Key Yes This is a set of 20 Boom cards that will help your students master finding the volume of cylinders, cones, and spheres. Eight cards have images drawn, and twelve are word problems. Problems include finding the volume when given an image, finding the volume from a word problem, finding the height, radius, or diameter when given the volume, and real world application problems.To use Boom Cards, you must be connected to the Internet. Boom Cards play on modern browsers (Chrome, Safari, Firefox, andPage 2These 101 word searches are a fun and engaging way for students to learn and practice reading words with blends, digraphs, nouns, verbs, adjectives, and adverbs, as well as, grade level sight words and vocabulary. Have you been wondering of a way to incorporate it into your lessons about volume, area, and perimeter? Look no further because you've found a fun project-based learning activity that will interest your students! Students will complete a Minecraft-inspired math project that is related to volume, area, and perimeter. You can use the project as an extension activity, individual assignment, group project, center work, or homework. Great STEM project!You will receivePage 4Idiom Posters & Activity: Idioms are part of everyday speech, yet we assume that our students know what they mean! This resource allows teachers to introduce one idiom per week with a definition and an example! Some problems require the Pythagorean Theorem to find a missing dimension. Along with identifying formulas, there are a total of 24 problems in the book in which students must calculate the volume or surface area. Directions for printing and answer key included.This flip book activity was created for a high school levelThis pre-algebra scavenger hnt provides students with practice solving problems involving the volume of cylinders, cones, and spheres.Option 1: This 9 question scavenger hunt provides students with practice using the formulas for volume of cylinders, cones, and spheres. There are a variety of questions. Most questions (7 out of the 9) ask for the volume of one of the figures, given either the radius or diameter. Two questions ask for the height, given the volume and the radius.Option 2: (NEW!5th Grade: Volume Unit Test (Summative Assessment)by Volume Test- A Perfect Fit to Common Core Standards: Assesses student understanding of the unit cube, unit cube irregular shapes, unit cube rectangular prisms, rectangular prisms with U.S. and metric measurements, and combined volume.
